

Martin DAVID

Postdoctoral student (INRIA)

French qualification for the position of Assis. Prof.

Laboratory of Mathematics and their Application – UMR CNRS 5142

Université de Pau & des Pays de l'Adour (UPPA)

ABOUT ME

Graduated with a doctorate in engineering sciences, passionate by scientific research and teaching, I wish to make a career as a university lecturer and researcher. I consider myself as a social and respectful person that always gives its best for the group benefit.

LANGUAGES

English: B2 (TOEIC 850)

Spanish: school level

COMPUTER KNOWLEDGE

Programming : MATLAB (7/10) Fortran (8/10), Visual Basic (8/10), Gnuplot: (9/10)

CFD

- Code_Saturne (9/10)
- ANSYS Fluent: (7/10)
- TrioCFD: (9/10)
- Comsol: (6/10)
- Fire Dynamics Simulator: (5/10)

Visualization

- Paraview (9/10)
- VisIt (8/10)
- Tecplot360 (5/10)

Meshing

- GMSH (8/10)

Others

- WindPRO (8/10)
- OpenWind (7/10)

Date

2018-2021

2015-2018

2013-2015

2012-2013

2012

Training - Education

PhD thesis at the PROMES – CNRS laboratory - *Perpignan*

Simulation and modeling of flows in gas-pressurized solar receivers

Ph.D. defense: 11/26/2021 - jury: DOR C.Castelain, Pr S.Vincent, EDOR G.Flamant, DOR J.Magnaudet, and Pr A.Bastide

Engineering school ‘Ecole Nationale Supérieure en Génie des Technologies Industrielles’ (ENSGTI) - *Pau*

Specialization in industrial energy

- Fluid mechanics
- Renewable energies
- Computational fluid dynamics
- Numerous team projects

Preparatory classes to engineering school - *Pau*

Undergraduate studies to prepare for competitive entry exams to engineering schools at lycée Paul Cézanne - *Aix en Provence*

Scientific high school diploma with honours - *Aix en Provence*

Date

10/2018 – 09/2021

Ph.D. defense:
11/26/2021

10/2022 - 10/2023

09/2021 - 09/2022

04/2018 - 09/2018

06/2017 - 09/2017

Ph.D. thesis

Ph.D. thesis - PROMES CNRS superv. by A.Toutant and F.Bataille - *Perpignan* **Simulation and modeling of flows in gas-pressurized solar receivers**

Research areas: computational fluid dynamics, turbulence, heat transfers, CSP
Expert in Thermal Large Eddy Simulations and Direct Numerical Simulations

- High Performance Computing (HPC)
- Multi-scale approach
- TrioCFD – use and programming, VisIt

Professional experiences

Postdoctoral student - INRIA – supervised by Rémi Manceau - *Pau*

Development of an adaptative hybrid RANS/LES methodology

CFD, self-adaptive meshing based on physical criteria, HTLES model
🔧 Code_Saturne, GMSH

Temporary research and teaching assistant - PROMES CNRS - *Perpignan*

Development and improvement of subgrid-scale models of T-LES

CFD, turbulence, heat transfers, mixed models, CSP
🔧 TrioCFD, VisIt

Industrial internship (M2) - EOLINK supervised by M.Guyot - *Brest*

Optimization of windturbine placement in an offshore windfarm

Code development, wake model, optimisation algorithm

🔧 Matlab, WindPRO, OpenWind

Research internship (M1) - PIMENT superv. by A.Bastide - *La Réunion island*

Modeling smoke extraction in buildings

CFD, mixed convection, natural ventilation, smoke extraction

🔧 Fire Dynamics Simulator, Tecplot360

Research activities

- Publications in scientific journals
 - International: 6
 - National: 2
- Conferences
 - International: 5
 - National: 3
- Obtaining computational hours on supercomputers (total: 18 million of hours)
 - 2 calls for national projects (DARI)
 - 1 call for european project (PRACE)
- 1 review for an international conference
- 3 reviews for a national conference

Teachings

- 330 hours (lectures, tutorials, practical works, and projects)
 - Perpignan Via Domitia University & Sup EnR engineering school (300h) - *Perpignan*
 - ENSGTI engineering school (30h) - *Pau*
- 60 hours of private lessons to secondary school pupils - videoconference - Hellomentor plateform
- Volunteer homework support at the Hameau social centre - *Pau*

Awards

- Valedictorian in engineering school, ENSGTI diploma obtained with jury's special mention
- 2 times selected for Biot-Fourier award of the Société Française de Thermique (2020-21)
- Ranked 4th of the Assis. Prof. competition of the PROMES laboratory in 2022

Publications

■ Papers published in international journals:

- M. David, A. Toutant, et F. Bataille, "Thermal Large-Eddy Simulations methods to model highly anisothermal and turbulent flows", *Physics of Fluids*, vol 35, p. 035106, Mar. 2023.
- M. David, A. Toutant, et F. Bataille, "Study of asymmetrically heated flows passing through gas-pressurized solar receivers using Direct Numerical Simulations", *International Journal of Heat and Mass Transfer*, vol. 201, p. 123577, Feb. 2023.
- M. David, A. Toutant, and F. Bataille, "Impact of asymmetrical heating on the uncertainty propagation of flow parameters on wall heat transfers in solar receivers," *Applied Thermal Engineering*, vol. 199, p. 117547, Nov. 2021.
- M. David, A. Toutant, and F. Bataille, "Direct simulations and subgrid modeling of turbulent channel flows asymmetrically heated from both walls," *Physics of Fluids*, vol. 33, no. 8, p. 085111, Aug. 2021.
- M. David, A. Toutant, and F. Bataille, "Investigation of thermal large-eddy simulation approaches in a highly turbulent channel flow submitted to strong asymmetric heating," *Physics of Fluids*, vol. 33, no. 4, p. 045104, Apr. 2021.
- M. David, A. Toutant, and F. Bataille, "Numerical development of heat transfer correlation in asymmetrically heated turbulent channel flow ,," *International Journal of Heat and Mass Transfer*, vol. 164, p. 120599, Jan. 2021.

■ Papers published in national journal:

- M. David, A. Toutant, and F. Bataille, "Analyse de sensibilité des flux de chaleur pariétaux en canal asymétriquement chauffé au moyen d'une corrélation permettant d'estimer les transferts de chaleur," *Entropie*, vol. 2, no. 2, Nov. 2021.
- M. David, A. Toutant, and F. Bataille, "Evaluation de modèles de simulation des grandes échelles en canal plan turbulent chauffé asymétriquement: de la comparaison des grandeurs intégrales à l'analyse des corrélations," *Entropie*, vol. 1, no. 4, Nov. 2020.

Conferences

■ International conferences:

- M. David, M. Mehta, and R. Manceau, "Towards self-adaptivity in hybrid RANS/LES based on physical criteria" presented at the 10th international symposium on Turbulence, Heat and Mass Transfer, Rome, Italy, Sep. 2023
- A.Toutant, M. David, Y. Zatout, F. Bataille, L. Mathelin, O. Semeraro, "Thermal large eddy simulations for high temperature solar receivers" presented at the 17th International Heat Transfer Conference, Cape Town, South Africa, Aug. 2023
- M. David, A. Toutant, and F. Bataille, "Study of anisothermal channel flow physics with direct numerical simulations" presented at the Franco-Polish Mechanics Seminars, Perpignan, France, Oct 2021.
- M. David, A. Toutant, and F. Bataille, "Assessment and comparison of Large Eddy Simulations in asymmetrically heated and highly turbulent channel flows" presented at the International ERCOFTAC Symposium on Engineering Turbulence Modelling and Measurements, Rhodes, Greece, Sep. 2021.
- M. David, A. Toutant, and F. Bataille, "Sensitivity analysis of heat transfers in an asymmetrically heated turbulent channel flow" presented at the International Conference on Computational Heat Mass and Momentum Transfer, Paris, France, May 2021.

■ National conferences:

- M. David, A. Toutant, and F. Bataille, "Tests et améliorations de modèles mixtes de Simulation des Grandes Échelles d'un écoulement à fort nombre de Reynolds en canal asymétriquement chauffé," presented at the SFT, Valencienne, France, Jun. 2022.
- M. David, A. Toutant, and F. Bataille, "Développement et analyse d'une corrélation pour estimer les transferts de chaleur en situation de fort chauffage asymétrique d'un écoulement en canal," presented at the SFT, Belfort, France, Jun. 2021.
- M. David, A. Toutant, and F. Bataille, "Tests a posteriori de modèles de sous-mailles dans un écoulement en canal plan à haut nombre de Reynolds et soumis à un fort flux de chaleur," presented at the SFT, Belfort, France, Jun. 2020.
